CAREER OBJECTIVE

Enthusiastic B.Tech Computer Science Engineering student with knowledge of Java, Data Structures & Algorithms (DSA), HTML, CSS, JavaScript, and MySQL, seeking an entry-level Web Developer role to apply programming and problem-solving skills in building efficient and user-friendly web applications. Passionate about developing web-based solutions and continuously learning modern technologies to improve development skills.

EDUCATION

Bansal College of Engineering Mandideep | B.Tech, Computer Science | (2023–2027)

XII (MP Board) | 68% | 2023

X (MP Board) | 52% | 2020

SKILLS

Technical Skills: Web Development | API Integration

Programming & Frameworks: Java | C++ | JavaScript | HTML | CSS | Express.js

Database: MySQL

Concepts: Data Structures & Algorithms | Object-Oriented Programming

Tools: IntelliJ IDEA | VS Code

PROJECTS

Weather Application – Web Based Weather Forecast System

- Designed and developed a web application to display real-time weather information.
- Built the frontend using **HTML, CSS, and JavaScript** for a responsive user interface.
- Developed backend using **Django** and integrated **Weather API** to fetch live weather data.
- Stored and managed application data using **SQLite database**.

Lost & Found Portal – Web Based Item Tracking System

- Developed a web application to help users report and find lost items.
- Built backend functionality using **Node.js and Express.js**.
- Managed application data using MySQL database.

CERTIFICATIONS

- Oracle Generative AI Certification** – Oracle
- Java Certification** – HackerRank
- DSA Certification** – NPTEL

ACHIEVEMENTS

Project-Based: Developed academic web projects such as **Weather Application** and **Lost & Found Portal** integrating frontend, backend, and database technologies.

Technical Development: Earned certifications in **Generative AI** from Oracle, **Java** from HackerRank, and **Data Structures & Algorithms** from NPTEL.
